SUMMARY

IT professional with 4 years of experience, including 1 year as a **Front-End Developer** skilled in **React**, JavaScript, HTML, CSS, Bootstrap, Sass, **Tailwind CSS**, **Material UI**, **Redux**, **Next.js**, **TypeScript**, and **Cypress**, and 3 years as a QA Engineer with an **ISTQB** certification. My strong QA background ensures a meticulous approach to development, enhancing code quality and reliability. Known for attention to detail, problem-solving skills, teamwork, effective communication, and time management, Committed to delivering high-quality, user-centric web applications.

WORK EXPERIENCE

FRONTEND DEVELOPER - Freelance   Jan 2024 - Present

➔ Developed interactive and user-friendly web applications using **JavaScript** and **TypeScript**, ensuring robust and maintainable codebases.

➔ Developed well-structured and **semantic HTML** code, implemented modern **CSS** techniques like **Flexbox** and **Grid** layout to create dynamic, visually appealing layouts that enhance user experience.

➔ Experienced in utilizing popular front-end frameworks and libraries such as **Bootstrap**, **Tailwind CSS,** and **Material UI**, along with preprocessors like **SASS**, to streamline development processes and create visually stunning and responsive web interfaces.

➔ Designed and developed complex single-page applications(**SPAs**) using **React.js**, effectively managing application state with **Redux** or **Context API**, and utilizing **React Router** to implement seamless navigation and routing between different views within the application..

➔ Developed and deployed dynamic and responsive web applications with **Next.js**, ensuring seamless **server-side** rendering, **client-side** transitions, and optimized SEO and performance through both server-side rendering (SSR) and static site generation (SSG) techniques.

➔ Implemented **Redux Toolkit** to simplify state management and **Redux Persist** to enhance user experience and data consistency by saving and rehydrating application state across sessions.

➔ Experienced in seamlessly **integrating APIs**, including utilizing **Axios**, to facilitate asynchronous data retrieval, communication, and crud operations between front-end applications and backend services, ensuring efficient data handling and optimal user experience.

➔ Developed **end-to-end tests** for basic web functionalities using **Cypress.io**, ensuring a smooth user experience.

Roxy - Fifty-Five Financial LLC   Jan 2023 to Jan 2024
QA Engineer

➔ Involved in the testing of cutting-edge web scrapers tailored for searching, data collection, and bidding on vehicles sourced from various auction sites. Conducted deep db tests while checking that we were getting and screening the information correctly.

➔ Performed manual and automation tests on administration screens.

➔ Used automation tools for web scraping for ensuring the gathered data by main web scrapers.

ViewErp - Contract   Jul 2021 to Jan 2023

QA Engineer

➔ Involved in reviewing and analyzing software requirements and user stories, development and execution of Test Cases for Manual and Automation Testing in SDLC and STLC life cycles and worked in scrum team with agile ceremonies.

➔ Used cucumber framework with selenium webdriver, maven, gherkin, Junit, java, postman, Rest Assured, JDBC, jira, git, github tools while carrying through all activities.

BooxTeka - Contract   Jan 2020 to Jun 2021

QA Engineer

➔ Responsible for build and support automation framework. Performed manual testing and resolved test issues, tracked and prioritize defects, recorded test results.

➔ While performing tests, used tools are cucumber framework with java and also selenium webdriver, CSS and Xpath selectors, postman, Rest Assured, JDBC, SQL, sql developer,

➔ Worked with the scrum team and implemented all agile ceremonies like Daily StandUp, Grooming, Sprint Planning, Demo and Retro meetings.

SKILLS

Technical Skills:

HTML | CSS | JavaScript | TypeScript | React | Redux | Redux Toolkit | Redux Persist | Context API | Cypress | Tailwind | SASS | Bootstrap | Material-UI | Figma | Axios | Yup | Formik | Git | GitHub | APIs | Agile | Jira | SDLC | OOP | RESTful APIs | CRUD | Authentication | Authorization | Validation | SQL | Selenium | Cucumber | Java | Maven | Gherkin | Intellij | JUnit | JDBC | Selenium Grid | Click up | Hubb staff | Oracle SQL Developer | Azure Data Studio | Postman

Soft Skills:

Problem-Solving | Strong Communication | Time Management | Adaptability | Continuous Learning | Collaboration & Teamwork | Creativity.

PROJECTS

Ultra Stock App empowers users to manage their stock through a user-friendly web interface. This single-page application allows comprehensive inventory and order management, including viewing existing data, adding new entries, modifying details, and deleting records for products, firms, brands, sales, and purchases. Built with a modern technology stack, StockApp leverages React and Material-UI for a seamless front-end experience, while Python Django handles data operations and user access on the back-end. React Redux Toolkit further enhances the application by efficiently managing its internal state.

Todo-Nowie is a single-page task manager built with Next.js and React leverages Firebase login for secure access. Users can categorize and manage "Today's Todos" (new, in-progress, completed) and filter old tasks. Both "Today's" and "Big Todos" sections offer detailed views with step management (add/edit/delete) using Toast notifications. A mock API handles backend data, empowering users to stay productive and organized.

LANGUAGE   **English:** Conversational | **Turkish:** Native

EDUCATION   Selçuk University - Bachelor's Degree - Law   2008 to 2013

CERTIFICATE   ISTQB® Certified - Credential ID: 0123CTFL3961
